Attention: To Whom it May Concern

Neo Infrastructure (Aust) Pty Ltd were Contracted through the second half of this year by Transfield Services (Australia) Pty Ltd, to upgrade an existing Access Road to the Woodman Point Boating Precinct in Henderson, Western Australia.

The work included the reconstruction of two existing road sections, one approximately 107 m length and 9 m width, and the other approximately 180 m length with variable width (from 8 to 21 m including abutting parking bays, footpaths and pavement extensions). Upgrade of the first road included milling the surface and applying a seal, followed by installation of a polymer modified geotextile reinforced seal, polymer modified asphalt on tack coat, signage and line marking. Upgrade of the second road included demolition of the existing road surface, realignment / reconstruction of existing Services (Telstra, Power, Mains Water Supply), installation of new Services (Stormwater and Sewerage reticulation), and installation of standard type pavements over granular soils (asphalt, primerseal, basecourse and sub-basecourse).

Neo Infrastructure were instrumental in maintaining a high standard of work whilst meeting other project objectives including the carrying out the construction works quickly, minimising disruption to the users and businesses in the precinct, keeping local businesses informed at all times about timing of works, and minimising construction issues that impacted with businesses.

I found Neo Infrastructure to be very professional with their approach to the works and I have no hesitation in recommending Neo Infrastructure as a competent and experienced Civil Contractor to other potential clients and organisations.

Yours Sincerely,

A handwritten signature in black ink that reads "Trevor Spackman".
